

FEASIBILITY STUDY FOR POWER DEMAND MANAGEMENT
IN MUBARRAZ ISLAND
HSE PLAN

3.0 PURPOSE OF THE DOCUMENT

This is a Test Comment along with comments in Sticky notes format.

The purpose of the HSE Plan is to define the Project HSE organization, systems and objectives applicable to **Engineering** Phase activities included in the scope of work for the “FEASIBILITY STUDY FOR POWER DEMAND MANAGEMENT IN MUBARRAZ ISLAND” which covers the two packages:

- **Study 1:** Study to reduce the motor starting current of higher rating motors
- **Study 2:** Study to install temporary power generator

The HSE Plan is developed for this stage and then updated before being formally issued prior to the commencement of each succeeding stage of project development, when a closer definition of HSE requirements has been established.

The HSE Plan is developed in line with ADOC Procedure for Project HSE Plan (ADOC-HSEMS-GSP-03) requirements and **ADNOC HSE Standard (HSE-GA-ST06 -Project HSE Plan)**.

The majority of deliverables mentioned in the HSE Plan pertain to the Conceptual Engineering for the Scope of Work under **Study 2:** Study to install temporary power generator. In contrast, **Study 1:** Study to reduce the motor starting current of higher rating motors primarily involves an electrical feasibility assessment with minimal HSE implications; therefore, only limited HSE input is required for this study.

The HSE Plan is a controlled Project document “live document” and as such shall be reviewed and updated to reflect pertinent changes across the different stages of the project. Hence this document is live document, which shall be updated, when necessary.

4.0 DEFINITIONS AND ABBREVIATION

4.1 Definitions

PROJECT	:	FEASIBILITY STUDY FOR POWER DEMAND MANAGEMENT IN MUBARRAZ ISLAND
LOCATION	:	MUBARRAZ ISLAND / WEST MUBARRAS
COMPANY	:	Abu Dhabi Company Oil Company LTD (ADOC)
ENGINEERING CONSULTANTS	:	Avenir International Engineers & Consultants L.L.C
SHALL	:	This word is understood to be mandatory to comply with requirements
